MID VALLEY DISPOSAL COMPOST FACILITY

The use of recycled food waste as compost improves soil health, structure and increases drought resistance.

Three-phase process finishes organic compost in as little as 8 weeks

Community sourced, locally recycled materials that utilizes food scraps and green waste collected through existing routes

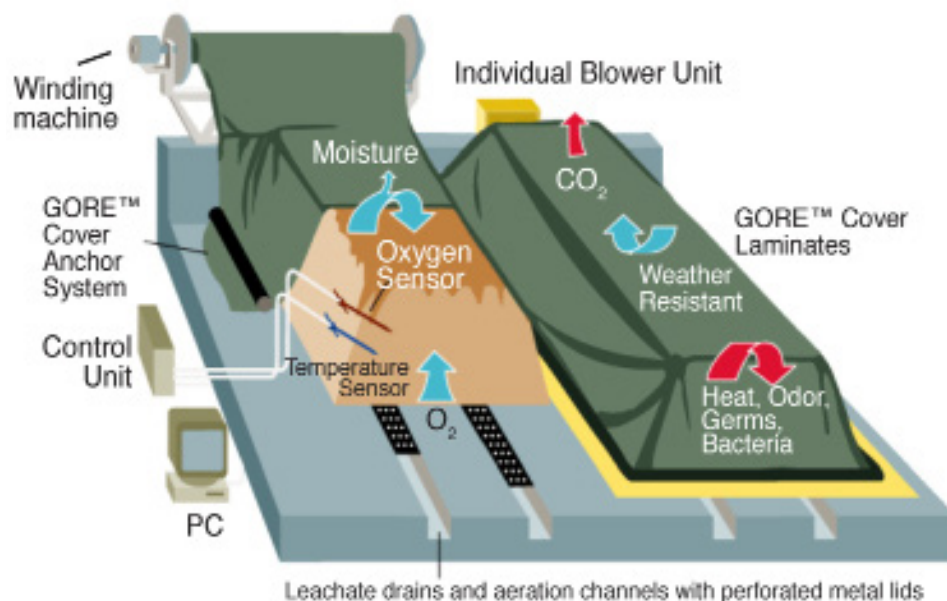

High value soil amendment for agriculture use, CDFA Certified Organic

Sustainable alternative to landfilling, helping reduce greenhouse gas emissions from organic waste disposal

Reduce greenhouse gas emissions by approximately 150,000 metric tons of CO₂ annually

Divert up to 71,000 tons of organic material from the landfill each year at full build-out
